Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the patent to Ledwidge ('674).

Ledwidge discloses (see claim 1) a method of measuring cavitation (formation of bubbles) in a fluid. The method includes sensing energy pulses associated with a plurality of cavitation events in a selected volume of the fluid. The method includes discriminating against cavitation events that occur in the fluid outside the selected volume. It is pointed out that the claimed "discriminating" step does not further patentably distinguish over the Ledwidge method since the step of sensing cavitation within a given volume inherently discriminates against cavitation outside the given volume. Claim 1 is so anticipated.

Claims 2-7 are further anticipated by Ledwidge.

Allowable Subject Matter

3. Claims 8-20 are allowed.
